- Safe & Reliable.

FIELD SERVICE PURGER

File Literature 1100-05B

For Refrigerants R-11, R-113, R-114 & R-123

Your Competitive Edge...

Chillers can become air-logged due to sudden leaks or during servicing. OEM high efficiency systems require **hours of purging** to bring a chiller fully back on line.

When your customer demands that you get its air-logged chiller back on-line fast, **Redi Controls' Service Purge** is the **only portable tool** available.

Redi Controls' Service Purge is as efficient as most OEM high efficiency purges, but is ***much faster***. It will purge down a typical chiller in less than an hour.

The **Service Purge** has no refrigeration unit or purge tank to maintain, nor complicated operating controls. Its compact light-weight three-piece design makes it easy to transport and use.

The **Service Purge** can “save the day” and make you a **hero** to your customer. It's an *image building tool* that will distinguish you from your competition. When the **“chips are down”** a chiller owner will call the company it **knows** can get them back on-line **fast**.

Today you need every **competitive edge** possible to keep your customer **calling you!**
